CCX: Custom Courses on edX

(the feature previously known as POC)

Peter Pinch and Peter Wilkins

OFFICE OF DIGITAL LEARNING
ENGINEERING DEPARTMENT

Why?

- 28% of MITx MOOC students self-identify as educators[1]
- We get many requests from educators to use MITx:

  - in their own courses
  - with their own students

1. http://www.educause.edu/ero/article/enrollment-mitx-moocs-are-we-educating-educators

Why not SPOCs?

We have done this before, but SPOCs:

- are too hard to set up
- require too much training
- allow content modifications

What is a CCX?

Delegated educators ("coaches") can:

- adjust start dates & end dates
- select a subset of material from the MOOC
- invite & administer a *small* group of students
- view and download grades for their group of students
